

I prefer listening to radio over FM translator service vs LPFM. Air1 on FM translator serves me as a resident in my local community by providing Christian music that is unavailable via local radio stations. If Air1 were to be displaced by an LPFM broadcaster with other programming, the effect would be a loss of Christian music and the potential for an increase in radio I am uncomfortable letting my child hear. The service provided by Air 1 is in the public interest since it provides radio the entire family can listen too without concern of exposing children to offensive music or language. Please don't take FM translators away and replace them with LPFM.
